

Bengal Spirit

Health Guarantee

We stand behind our kittens!

Our Bengal Kittens are examined for overall health & wellness to the best of our knowledge and will be up to date with age appropriate shots, and vaccinations before going to their forever home. They will be seen by a veterinarian a minimum of FOUR times; 6 weeks old, 9 weeks old, 12 weeks old and at alter appointment. Those who travel will be seen another time for their health & travel certificate. We can administer these vaccinations ourselves and reduce costing and time, however we decided to have a licensed professional give the vaccines guide us, and thoroughly examine each kitten with a keen eye. We are 100% confident each kitten is healthy and free of diseases and infections.

The health of our kittens is our number one priority. We do all we can to decrease the likelihood of disease & illness, such as FIP, leukemia, HIV & upper respiratory infections. Even with preventative measures such as vaccinations, we are unable to eradicate disease 100% of the time. No cattery can guarantee this for you. We can guarantee we will be there for you and with you every step and offer guidance when we can.

We are always available to assist our clients with questions or concerns for the duration of the cats life. Our relationship with you does not end when you take home a kitten. If something goes wrong, we guarantee we will do everything to ensure your new kitten is healthy! We are forever in your pocket.

Your Bengal will be replaced for a period of two years from date of birth if it develops a life-threatening congenital illness, hereditary, genetic or congenital defect which would affect this Bengal's quality of life. Veterinary verification is required. Cats who are not properly cared for and or are not current with veterinary visits and immunizations are not covered.
